

DRONE VOLT

France's Sole Drone Maker listed on Euronext Paris

Villepinte, June 9th 2015 – DRONE VOLT, the French leader in professional use drones, announces its registration as an aircraft and aerospace manufacturer by the French administration. This recognition makes DRONE VOLT the only specialist drone maker listed on the Euronext's markets.

A market which is restructuring

Presented with tremendous opportunities offered by the fast expanding market for drones, the Industry is gradually restructuring. Already registered by the Direction Générale de l'aviation civile (French Civil Aviation Authority), DRONE VOLT has gone a step further by obtaining registration as an aircraft manufacturer.

DRONE VOLT thus reinforces its strategic Value Added position in the Industry and its ability to offer its customers a global solution, yet one which has been customized to their needs.

New announcements are expected

In the coming weeks, DRONE VOLT will announce the launch of its first drones "designed by DRONE VOLT". These new models developed by the company's R & D team located in Villepinte (near CDG PARIS airport) will meet the business challenges in areas of high demand such as agriculture.

Dimitri BATSIS, President of DRONE VOLT Group, says: « *With the opening of the PARIS AIR SHOW in Le BOURGET in only a few days, it is indeed a great honor to be recognized as an aircraft manufacturer in its own rights. We are set to position ourselves as a world-class player in the sector of professional drones. We also offer the opportunity for investors to support the only 100% French professional drone maker listed in France.* »

About DRONE VOLT

Established in 2011, DRONE VOLT is a company that specializes in the design and marketing of civilian drones for professional use. A global partner, the company offers its customers business solutions, including customer specific services and pilot training. The young company, which achieved a turnover of 1.7 million euros in 2014 (+ 40%) is a world leader in audiovisual-use drones. Among its customers are the CERN, FRANCE TELEVISIONS, the Gendarmerie des Transports Aériens (GTA), SPIE, TF1, the TOUR DE FRANCE - FREEWAY PROD, etc.
