

DRONE VOLT

Referenced at POINT.P Building Materials

Villepinte, France, April 20, 2017 - **DRONE VOLT**, a French manufacturer of professional drones, brings Construction and Public Work drones into their new POINT.P Building Materials tool catalog available since April 10, 2017.

DRONE VOLT referenced in the new Point.P Building Materials tool catalog

DRONE VOLT is now listed in the new POINT.P Building Materials tool catalog, specialized in the distribution of professional construction materials. Edited in 360 000 copies and also downloadable, the tool catalog has been available since April 10th in 800 of the network's POINT.P Building Materials French branches.

With the surge of "Construction Tech" and the digitization of the building industry, POINT.P Building Materials has integrated drones in its catalog for the first time among its 5,000 references. The Tool catalog "drones" section opens with DRONE VOLT innovation: The HERCULES 10 SPRAY CAPTIF.

Key in hand Drone solutions

To allow customers to be quickly operational with their tasks, POINT.P Building Materials has chosen a complete drone offering from purchase to flight training and various inherent administrative procedures.

The DRONE VOLT offer in the POINT.P Building Materials tool catalog is based on professional drones, software, cameras, accessories and services:

- for treating and cleaning fronts and roofs by spraying with the HERCULES 10 SPRAY CAPTIF,
- for thermography and heat loss detection,
- for photogrammetry and topographic surveys,
- for various inspections.

The drone is the ideal tool for site monitoring, 3D modeling of buildings, surface treatment using spray, thermal reports or various facade condition diagnoses and waterproofing...It also allows you to perform technical inspections of hard-to-reach areas in a secure manner without the use of scaffoldings.

"DRONE VOLT, already recognized in the construction industry, is proud to be partners with POINT.P Building Materials, a major player in the distribution of building materials.

This collaboration illustrates the growth of the Tech Construction and the Construction and Public Work drone market. Building professionals are always looking for new solutions to optimize their costs; The drone allows them to increase productivity and security on their missions, "comments Olivier Gualdoni, Managing Director of DRONE VOLT.

The tool catalog is available:
