

## DRONE VOLT

---

### Presents its latest innovations to the US Government and other international news

---

Villepinte, August 28, 2017

**DRONE VOLT, an industrial drone manufacturer, is pleased to announce the successful demonstration carried out by Daniel Roe, Executive Vice President of Sales in the US, and the US-based R&D team (Rapid City, South Dakota) (US Department of the Interior, US Forest Department, US Department of Energy, etc.).**

The HERCULES 5 UF, a wired industrial drone with unlimited flight time, developed and built by DRONE VOLT, equipped with a thermal camera and a x30 zoom, has been inundated with success and interest from governmental organizations, impressed by the camera's quality, definition but also the image's precision as well its stability and system reliability. The x30 zoom lets you perform facial recognition at more than 100 meters and records license plates from up to 400 meters.

"This recent demonstration is completely in line with DRONE VOLT Group's international development strategy. Several HERCULES orders will be finalized by September 2017, which reflects the strong interest for our company's technological expertise in aeronautics", said Olivier Gualdoni, CEO of DRONE VOLT.

In France, the first deliveries from the HERCULES range took place this summer 2017. These deliveries went to large companies specialized in the defense sector. The interest shown by many major players in different sectors suggests that other international groups could soon confirm the acquisition of drones in the HERCULES range, which are entirely manufactured in France at the DRONE VOLT production unit in Villepinte. DRONE VOLT should double the quantities of delivered HERCULES drones in the third quarter compared to the first two quarters.

Following the successful integration of the first acquisition, DANDRONE in Denmark, which allowed DRONE VOLT Scandinavia to double in size (with a cumulative turnover of 2 MEUR) and achieve financial balance, DRONE VOLT is actively and very selectively seeking other targets.
