## exhibits at SCTX Security & Counter Terror Expo to conquer Great Britain market

---

Villepinte, France, March 6, 2018

**DRONE VOLT, the French manufacturer of professional industrial drones, is set to conquer the British market and will exhibit its surveillance and security range at SCTX Security & Counter Terror Expo, the reference for trade shows dedicated to security in London (Olympia - Stand no. I41), from 6<sup>th</sup> to 7<sup>th</sup> of March 2018.**

### The United Kingdom, a new territory to be developed

DRONE VOLT pursues its international business development strategy to develop new priority markets.

For the first time, DRONE VOLT will present its range of aerial and ground surveillance and safety products at the SCTX trade show, including the HERCULES 5 UF "Unlimited Flight" wired drone, the HELIPLANE, the ALTURA ZENITH, the PENSAR camera and the HERCULES 10 PROTECTOR:

**HERCULES 5 UF:** A true autonomous monitoring station, the HERCULES 5 UF is a wired drone whose 24/24 hovering flight mode ensures continuous aerial surveillance over an area of 500 hectares with secure data retransmission.

From a 100 meter-high observation point it can transmit HD images. A WIFI HOTSPOT for Internet connection can be adapted to the drone for coordinating operations within the sector.

**HELIPLANE:** vertical take-off and landing within a 1m<sup>2</sup> range, mobile, easy to deploy, 90-minutes of autonomy, live transmission of images, etc.

**PENSAR Camera:** dedicated to real-time data analysis per embedded processor with 1.5 teraflops of power.

All these models are designed for public safety and industrial surveillance. The DRONE VOLT range has recently been completed by the **Streampack**, a mobile solution allowing live transmission and control via a 3G/4G network.

### The UK's drone market is booming

According to BI Intelligence, UAV sales could exceed \$12 billion in 2021.

Civilian **surveillance drones** can be used in many fields of expertise: inspection and surveillance of dangerous sites or infrastructure, crowd monitoring, support for **civil security operations** such as rescue, assistance in the aftermath of natural disasters etc.
