

DRONE VOLT

Takes advantage of favorable winds in the "safety and surveillance" sector in the United States

Villepinte, April 11, 2018

DRONE VOLT, French manufacturer of professional civil UAVs, presents its UAVs and its "Security and Surveillance" solutions at the ISC WEST in the United States.

DRONE VOLT pursues its development in the major "Security and Surveillance" sector and maintains its course towards international deployment, considered by the company to be an important growth lever.

The company will focus on this dual objective by seeking new markets at highly renowned international trade shows:

ISC WEST in Las Vegas, USA from 11 to 13 April 2018, which is an international security exhibition fair – at Stand 6141 SANDS EXPO

DRONE VOLT continues to grow its activity in the United States, which has been identified as a high-potential territory.

On a stand of over 35 m², the team will present the entire range with a focus on:

- The new HERCULES 2: launched at this event, the Hercules 2 is a compact and ultra-transportable individual drone designed for recognition and for immediate deployment.
- The PENSAR camera: driven by artificial intelligence, it is one of the world's first dual spectrum digital vision platforms for real-time image and data analysis.

Artificial intelligence, which is becoming a major driver of the digital economy, could generate a global turnover of almost 90 billion dollars in 2025 against only 3 billion dollars in 2016.

DRONE VOLT is also taking part in the **DEFEXPOINDIA exhibition in Chennai, India from 11 to 14 April 2018** on its partner MISTRAL (AXISCADES Group)'s stand – at Stand n° 6.10.3e HALL 6

As part of an alliance formalized in 2017 with AXISCADES Group, a major player in the "aeronautics and defense" sector, DRONE VOLT will present the HERCULES 5 UF, the HELIPLANE and the HERCULES 10 PROTECTOR at the exhibition.
