

DRONE VOLT

Continues its commercial development in Latin America

Villepinte, April 24, 2018 –

DRONE VOLT, the French manufacturer of professional industrial UAVs, is stepping up its commercial implementation in Latin America. DRONE VOLT exhibits its "Security and Surveillance" range at EXPO SEGURIDAD (Mexico), from 24 to 26 April 2018 - stand 4140.

DRONE VOLT intensifies its commercial presence

DRONE VOLT is increasing its commercial presence in Latin America with no external growth operations but by developing a network of distributors on Mexican territory as well as in other countries in the Latin American zone.

In this geographic area, Mexico represents one of the most promising markets, particularly for security.

Indeed, the Mexican federal budget devoted solely to national security in 2018 is over 4.4 billion euros, which represents an increase of 18% over the 2017 budget, which amounted to nearly 3.75 billion euros¹.

An exclusive 5-year distribution agreement was signed last March between DRONE VOLT and PROSIC, a company specializing in the distribution of lifting platforms based in Mexico. The contract stipulates minimum purchases of 2.25 million euros over 5 years to maintain exclusivity.

Present at the Latin American Security Exhibition of Reference

After exhibiting its "Security and Surveillance" range at the Colombian EXPODEFENSA exhibition, DRONE VOLT presents the range for the second consecutive year at EXPO SEGURIDAD, the Mexican reference event in this field, which is held in Mexico City from 24 to 26 April 2018.

In this range, two new solutions are unveiled for the first time at the show:

- The PENSAR camera, a unique solution driven by on-board artificial intelligence, designed for inspection or surveillance.
- HELIPLANE: a professional hybrid VTOL UAV (with vertical take-off and landing), used for example for border surveillance or the inspection of industrial sites.

Next press release: 1st half 2018 sales, week of 16 July 2018
