---

### Promising new contract in the security area

---

Villepinte, June 14, 2018

**DRONE VOLT, a French aeronautics manufacturer specializing in professional civilian drones, has announced the signing of a promising new contract in the security area.**

This contract, which follows several months of negotiations, was reached with the armed forces of a Scandinavian country. Given the strategic nature of this contract, its terms and the identity of the client must remain confidential.

According to Olivier Gualdoni, the chairman / CEO of Drone Volt, *"this contract, which is highly important for our industry reputation, is the result of the efforts and cooperation of all our teams on international markets. This success is concrete evidence of the ability of our teams to sign contracts with government agencies throughout the world."*

Along the lines of its framework agreement signed with the French army<sup>1</sup> and the USD6m contract signed with a government agency in southeast Asia<sup>2</sup>, this new major commercial success illustrates the recognition obtained by Drone Volt in the universe of professional civil drones destined for the security and defense sector.

This contract, signed on the sidelines of the EUROSATORY exhibition where Drone Volt is presenting its products through June 15, 2018, represents the successful conclusion of one of the 65 contracts negotiations announced in the press release dated March 12, 2018.
