
DRONE VOLT

Cooperation project with DIETSWELL in the inspection of offshore oil platforms and windfarms

Villepinte, June 15, 2018

DRONE VOLT, a French aeronautics manufacturer specializing in professional civilian drones, has announced a cooperation project with DIETSWELL at the EUROSATORY international exhibition in Paris.

DIETSWELL is an independent specialist in technical assistance services for the oil & gas and renewable energies industries, particularly offshore windfarms. The two groups have decided to join forces in order to offer these industries personalized and innovative onshore and offshore UAV solutions to major international groups in these industries.

The inspection and maintenance of oil production installations are of primordial importance in order to assure their security and avoid failures that could have a negative impact on their image and profitability.

The use of drones will allow faster and more cost-effective deployment while significantly reducing the human risk (zones difficult to access, dangerous zones etc.).

The respective R&D teams of the two groups will collaborate on different projects involving the integration of drones. The shared solutions will allow faster and more cost-effective deployment in order to optimize the maintenance of offshore oil production sites and windfarms and reduce the human risk.

On this occasion, Olivier Gualdoni, the chairman / CEO of DRONE VOLT, declares that *“the DRONE VOLT group is highly enthusiastic regarding the development of its activities in the oil industry in collaboration with DIETSWELL. A new, highly promising opportunity is now opening up in the oil industry for our security and surveillance expertise, offering enormous potential for international deployment.”*

Jean-Claude Bourdon, President and founder of DIETSWELL, adds that *“I am pleased to be able to collaborate with DRONE VOLT in our business sectors, particularly in our well-known Fact-O-Rig division of our oil industry customers for drilling unit audit and inspection services, mainly offshore.”*

Next press release: H1 2018 sales, week of July 16, 2018

About DIETSWELL

DIETSWELL is a publicly listed company (symbol: ALDIE) specializing in providing onshore & offshore drilling solutions to worldwide O&G operators such as TOTAL, BP, Perenco, Repsol and Maurel & Prom etc.

It seeks to create value by developing proprietary technologies and management systems that enable energy companies and major oil companies to overcome the logistical, technical and operational constraints they face in the most difficult of today drilling environments. In addition, the company has diversified into renewable energy engineering by developing, with the support of the ADEME of which it is a laureate, a float support for large size wind turbines.
