

DRONE VOLT

Further progress in Asia

Villepinte, August 9, 2018

DRONE VOLT, a French aeronautics manufacturer specializing in professional civilian drones, has announced the signing of a contract with Electricity of Vietnam (EVN), the largest energy supplier in Vietnam, once again through its AERIALTRONICS subsidiary, which it acquired and turned around in less than one year.

EVN has approved an investment in an ALTURA ZENITH system equipped with the PENSAR camera driven by artificial intelligence in order to monitor and protect equipment and installations such as transformers, circuit-breakers, capacitors and telecommunications equipment.

This contract could serve as a first step in the creation of a national fleet, indispensable notably for monitoring an electrical network nearly 20,000 km long.

Through its recent successes in Indonesia, Thailand and now Vietnam, DRONE VOLT has built a very strong reputation in southeast Asia. Its reputation could be further enhanced as a result of advanced negotiations being conducted with new clients, notably in the Philippines, Malaysia and Singapore.

DRONE VOLT has once again successfully concluded one of the 65 contract negotiations announced last March.

Olivier Gualdoni, chairman / CEO of DRONE VOLT, indicated that *“Vietnam is a country with nearly 95 million inhabitants that is benefiting from growth of nearly 6% per year. Once again, the DRONE VOLT teams and technology have prevailed over the competition, thereby enabling the group to enter an enormous market.”*
