### Very strong acceleration in drone deliveries

---

Villepinte, October 1, 2018

**DRONE VOLT, a French aeronautics manufacturer specializing in professional civilian drones, has announced very strong acceleration in deliveries at DRONE VOLT FACTORY, the group's high valued-added drone production division.**

The group produced and delivered 19 drones in Q3 2018, including 18 DRONE VOLT HERCULES drones and one AERIALTRONICS ALTURA ZENITH drone vs. only six in the same period last year. The group also delivered one PENSAR camera piloted through artificial intelligence.

Since the beginning of the year, a total of 44 drones and intelligent cameras coming from DRONE VOLT R&D and the DRONEVOLT Group's production facilities have been delivered vs. 32 over the first nine months of 2017, thereby confirming the Group's transformation.

With a rich catalog of high value-added products issued from DRONE VOLT's R&D offices and the expertise coming from the AERIALTRONICS teams integrated in September 2017, two production sites in France and the Netherlands and a major accounts marketing team present at the principal professional trade shows throughout the world, the Group has the foundations needed to maintain this momentum.

This spectacular business development reflects the successful completion of a portion of the 60 bid tenders or direct negotiations with government agencies and major customers that DRONE VOLT has participated in since the beginning of the year.

*"We are on our way", declared Olivier Gualdoni, the chairman / CEO of DRONE VOLT. "Based on our presence on the ground with major customers and government agencies, we are highly confident that this pace of growth will continue for numerous quarters. Additionally, the average price remains strong and is continuing to rise thanks to the increase in the value added by our solutions in terms of carrying out increasingly complex missions requiring increasingly sophisticated technologies in terms of both hardware and embedded software."*

**Next press release: Q3 2018 sales, week of October 15, 2018**
