

DRONE VOLT

Targeting the security market in the United States

Villepinte, January 9, 2019

DRONE VOLT, a French aeronautics manufacturer specializing in professional civilian drones, has signed a contract with a government agency in the United States for the supply of two PENSAR intelligent cameras.

Negotiations are underway for a supplemental order for four other devices.

The PENSAR intelligent camera is the product of the research and development activities of AERIALTRONICS, a Dutch company whose assets were acquired only a year and a half ago. Over the last two months alone, an army in northern Europe and two government agencies in Belgium (civil protection and the Hainaut Centre civil protection zone) have purchased this high technology camera, a benchmark in the security area.

“This order for PENSAR cameras on the US market is an important first step for the DRONE VOLT group”, indicated Olivier GUALDONI, the chairman / CEO of DRONE VOLT. “There is an enormous need for high technology security and surveillance equipment in the United States and we are very confident in our ability to confirm our presence on this market over the very near future.”
