

## DRONE VOLT

---

### New order for ten HERCULES 10 drones with an option for an additional five

---

Villepinte, March 4, 2019

**DRONE VOLT, an expert in onboard intelligence and manufacturer of professional civilian drones, has announced the signing of an order for ten HERCULES 10 Spray drones accompanied by an option for an additional five drones.**

The HERCULES 10 Spray remains an exceptional model that allows a reduction in the danger to personnel, notably in connection with the cleanup of polluted or very hard to reach industrial sites. <https://www.dronevolt.com/en/expert-solutions/hercules-10-spray/>

This order comes from a construction sector company that is already a Group customer and demonstrates this company's desire to accelerate the deployment of DRONE VOLT solutions. This company had notably purchased four HERCULES 10 Spray drones in H2 2018. Deliveries will be spread out between March and November 2019.

This new order demonstrates the validity of the strategy targeting the deployment of Group solutions within major industrial groups. Initial small orders are now generating more significant volumes. The Villepinte assembly line is already dimensioned to meet this growing demand.

*"This is not only a major order that we have now received, but also proof of the reliability and effectiveness of our solutions,"* indicated Olivier Gualdoni, chairman / CEO of DRONE VOLT. *"Additional contracts of this type should be signed in 2019, with existing customers expected to place larger orders leading to large-scale deployment."*
