

DRONE VOLT

Major partnership with Nexter

Villepinte, March 27, 2019

DRONE VOLT, an expert in onboard artificial intelligence and manufacturer of professional civilian drones, has announced a major partnership with Nexter.

DRONE VOLT and the Nexter group (through its Nexter Robotics subsidiary) will join their technological expertise by combining an aerial drone and a land-based drone in order to develop a unique civilian and military surveillance solution.

Nexter Robotics has developed the NERVA®, a multi-mission land-based robot, for reconnaissance, exploration and security missions. The solution to be developed by the two companies will involve an aerial drone carrying a land-based drone to the center of its mission area and then recovering it.

Given its heavy payload capacity and software that notably allows autonomous flights, the HERCULES 20 perfectly meets the requirements of this program.

“The Nexter group needed to round out its offer with a reliable and autonomous aerial solution capable of carrying heavy payloads,” indicated Olivier Gualdoni, chairman / CEO of DRONE VOLT. *“The HERCULES 20 has virtually no equivalent on the market. It is for this reason that there is growing interest in this drone in connection with civilian and military applications.”*

Next press release: Q1 2019 sales, April 15, 2019 after the close

Next meeting: SMALLCAP EVENT® PARIS, April 16 – 17, 2019
