### Infrastructure inspection solution deployed in the UK

---

Villepinte, April 26, 2019

**DRONE VOLT, an expert in onboard artificial intelligence and manufacturer of professional civilian drones, has announced the delivery of the latest version of its ALTURA ZENITH drone equipped with its PENSAR camera to a UK infrastructure inspection specialist.**

AERIALTRONICS, a subsidiary of DRONE VOLT, has announced the signing of a promising contract followed by an initial delivery to an infrastructure inspection player in the UK.

This specialist in secured data capture and processing notably plans to deploy this solution in connection with the inspection of offshore wind turbines throughout Europe. These sites are most often located in zones featuring unstable weather conditions in which the ALTURA ZENITH excels based on its capacities.

This UK company is additionally highlighting the advantages of this solution in terms of eliminating risks to employees during offshore transfers and lifting operations.

*“This contract confirms the interest of our solutions in connection with the execution of dangerous missions,”* declared Olivier Gualdoni, chairman / CEO of DRONE VOLT. *“We effectively consider that the use of drones must meet two fundamental criteria: productivity gains for the company and ensuring employee safety.”*
