

DRONE VOLT

New order for two ALTURA ZENITH drones equipped with PENSAR intelligent cameras

Villepinte, August 7, 2019

DRONE VOLT, an embedded artificial intelligence expert and manufacturer of professional civil drones, has announced the signing of a new order for two ALTURA ZENITH drones equipped with PENSAR intelligent cameras.

This order, received by DRONE VOLT's Dutch subsidiary AERIALTRONICS, comes from a European surveillance and inspection player. In addition to the hardware, the order includes a training cycle.

The systems are slated to be used in the inspection of electric power lines. This order constitutes a first step in the assembly of a fleet that could reach 20 solutions of this type.

"We have now gained a new customer in the electric power line inspection area," indicated Olivier Gualdoni, chairman / CEO of DRONE VOLT. "This order, which could rather rapidly lead to others, is further evidence of the growing needs in terms of electric power line inspection throughout the world and of our recognized expertise in this area."
