

DRONE VOLT

Government agency order in view for the new Heliplane professional VTOL drone

Villepinte, September 10, 2019

DRONE VOLT, an embedded artificial intelligence expert and manufacturer of professional civil drones, has announced the successful launch of Heliplane, its new VTOL drone.

DRONE VOLT is in the process of finalizing an order for the latest version of the Heliplane VTOL drone with a government agency. This order should total over 200,000 euros and could lead to other, more significant orders.

The Heliplane is a VTOL (Vertical Take Off and Landing) drone capable of taking off and landing like a helicopter. As such, it does not require a take-off and landing runway. Modular and with autonomy of 60 minutes, it offers a much greater range than traditional drones.

“The group’s business is accelerating with increasingly substantial orders covering all the solutions offered by DRONE VOLT,” indicated Olivier Gualdoni, chairman / CEO of DRONE VOLT. *“The Heliplane allows long distance autonomous flights that make possible surveillance or delivery missions corresponding to the needs of numerous current and prospective customers.”*
