

DRONE VOLT

Delivery of the first four HERCULES 2 drones in the United States

Villepinte, October 1, 2019

DRONE VOLT, an embedded artificial intelligence expert and manufacturer of professional civil drones, has announced the first deliveries of its HERCULES 2 drone in the United States.

At a time when US Senators are pushing for a ban on drones coming from countries constituting “a threat to national security”, the DRONE VOLT group is demonstrating its ability to profit from this context and has announced the first four deliveries of its HERCULES 2 mini-drone to its US partner METATRON.

A 2kg drone able to fly at over 90 km/h and manufactured to a large extent using 3D printing, the HERCULES 2 is destined for reconnaissance missions, with a very broad range of applications in the defense, construction, inspection and security sectors.

“The DRONE VOLT group has enormous ambitions for its most recent drone,” stated Olivier Gualdoni, chairman / CEO of DRONE VOLT. “The HERCULES 2 responds perfectly to the demands of the defense and inspection markets in particular at a time when the current geopolitical context should open up major export markets for us.”

Next press release: Q3 2019 sales, October 16, 2019
