

DRONE VOLT

New success in Hungary

Villepinte, October 23, 2019

DRONE VOLT, an embedded artificial intelligence expert and manufacturer of professional civil drones, has announced new deliveries in Hungary.

DRONE VOLT has announced the sale and delivery of four drones from among its leading products to one of the largest distributors of agricultural machinery in Hungary.

Two HERCULES 20 drones, one HERCULES 10 drone and one ALTURA ZENITH drone equipped with the latest PENSAR SDK intelligent camera were delivered between April and October. These repeat orders were additionally accompanied by training programs required for the piloting of these drones.

These new zero emission solutions give Hungarian farmers access to non-polluting tools that will gradually serve as substitutes for older machines powered by diesel engines.

Taken together, these orders represent an amount exceeding 100,000 euros that will be principally accounted for in Q3 2019. New orders could be signed over the very near future given the very strong demand in Hungary.

"This company is a reliable distributor that has now been added to the list of our major repeat customers and it could pursue the expansion of its fleet over the coming months," indicated Olivier Gualdoni, chairman / CEO of DRONE VOLT. *"Our equipment allows the targeted spraying of crop treatments while at the same time reducing greenhouse gas emissions. Through its activities, DRONE VOLT is confirming its contribution to the Sustainable Development Objectives established by the United Nations as well as its profile as a stock eligible for SRI funds."*

Next press release: Q4 2019 sales, January 22, 2020
