

DRONE VOLT

Delivery of a HERCULES 20 SPRAY in Africa

Villepinte, February 27, 2020

DRONE VOLT, an embedded artificial intelligence expert and manufacturer of professional civil drones, has announced a new delivery of the “spray” version of its HERCULES 20 drone in Africa.

The “heavy lift” model of the HERCULES line, equipped with a 10 liter reservoir, is designed for missions involving the spraying of products to protect agricultural domains from parasites.

Once again, a drone (a “zero emission” and low cost solution) will be used in a mission previously assured by helicopters, thereby reducing operating costs and the environmental impact.

“This type of application should develop rapidly in Africa,” said Olivier Gualdoni, chairman / CEO of DRONE VOLT. “Our solutions could also be used to spray liquid disinfectants, as has been the case in certain cities in China in order to combat the coronavirus epidemic.”
