

## DRONE VOLT

---

### The Group has obtained a state guaranteed loan of 500,000 euros

---

Villepinte, April 22, 2020

**DRONE VOLT, an embedded artificial intelligence expert and manufacturer of professional civil drones, has announced that it has obtained a state guaranteed loan from its principal banking partner.**

The DRONE VOLT group is once again diversifying its sources of financing through the obtaining of a loan totaling 500,000 euros. These funds are already at the group's disposal.

In the framework of government measures, DRONE VOLT submitted a request to its principal banking partner for this loan, which features particularly attractive conditions. As a function of the form of repayment (to be chosen at a later date), the interest rate will range between 0.25% and 2% for a maturity that could run up to five years.

This state guaranteed loan has enabled DRONE VOLT to consolidate its financial structure in this context of an exceptional health crisis and to prepare for the resumption of its operations under the best conditions. This financing, which comes only a few days after a capital increase subscribed to essentially by the Group's long-term shareholders, will enable the Group to limit its use of highly dilutive financing instruments that have a negative impact on its share price.

*"This financing represents excellent news in this extraordinary context,"* stated Olivier Gualdoni, chairman / CEO of DRONE VOLT. *"With this loan, we can prepare for the resumption of operations in full confidence with a significantly reinforced cash position."*

**Next press release: Q2 2020 sales, July 22, 2020**
