

DRONE VOLT

Uses Artificial Intelligence to fight the spread of COVID-19

Villepinte, 26th of May 2020

DRONE VOLT, embedded artificial intelligence expert and professional civil drone manufacturer, announces the launch of its app which detects if people are applying their protection masks, essential to limit the disease's propagation.

This software, internally developed by AERIALTRONICS, Drone Volt's subsidiary specialized in AI, will be released as a SaaS (Software as a Service). It allows to detect masks on IP networks surveillance cameras. The markets range from: transport or health services, sporting events, malls, etc.

This once again demonstrates the company's innovation in the developing AI sector as well as its ability to process images in real-time. Furthermore, this tool will not only be great to deal with the current threat, but can be applied to a wide range of sectors : Personal Protective Equipment (PPE) detection on construction works, Riot prevention, etc

'This software relies on the Artificial Intelligence expertise obtained with the acquisition of Aerialtronics in Septembre 2017 .' Annouces Olivier Gualdoni, CEO of DRONE VOLT. 'This excellent technological development wouldn't have been feasible without Dimitri Batsis, our founder's, hindsight into Aerialtronics's potential.

Next Press Release : 2020 1st semestre turnover, 22nd of July 2020
