

DRONE VOLT

HERCULES 10 Spray soon to deploy to the Middle East

Villepinte, 1st of July 2020

DRONE VOLT, embedded artificial intelligence expert and professional civil drone manufacturer, announces a purchase order of 3 HERCULES 10 Spray for the Middle East.

The Hercules 10 drone is designed to spray liquid treatment products precisely over surfaces, roofs and facades. Its new approach to surface treatments allows to spray facilities precisely and efficiently, improving the economic and environmental advantages (spray in close proximity to surface, i.e. less waste) as well as operational safety (Fewer contact with products since less man operations).

These drones were specifically designed to clean hazardous and hard to reach areas even in the extreme temperatures observed in this geographical region, and dust-proof. The pay-load and flight time of a HERCULES 10 SPRAY allow it to treat up to 200m² of surface in less than 20 mins.

Including training and equipment, the purchase order reaches 100 000 euros. If all goes well it could lead to other more substantial purchase orders.

DRONE VOLT already invoiced 2/3 of the fee, generating a negative WCR, despite the planned order delivery of late July.

'Following the weeks of lockdown which greatly impacted our manufacturing and commercial activities, orders are resuming at an exciting rate and so is manufacturing to fully complement this Upturn' declares Olivier Gualdoni CEO of DRONE VOLT *'We can assume gradual commercial activities will resume in T3, which just started, especially considering no orders were cancelled during this lockdown'*.

Next Press Release: 1st Semester turnover, 22nd of July 2020
