

## DRONE VOLT

---

### Success of an online training course on the piloting of the HERCULES 10 Spray

---

Villepinte, March 10, 2021

**DRONE VOLT, embedded artificial intelligence expert and professional civil drone manufacturer, announces the success of the e-learning training that the company has provided to its customer in the Middle East as part of its order for three HERCULES 10 Spray UAVs announced on July 1<sup>st</sup>, 2020.**

Due to travel restrictions imposed by the French and Saudi authorities related to the health crisis, the training sessions could not be held on site. DRONE VOLT therefore set up an e-learning system for theoretical and practical training on the use of the HERCULES 10 Spray UAVs delivered to the customer. In this context, the company accompanied its customer step by step for 2 weeks to train him in the piloting of the drone and to carry out his spraying missions.

The HERCULES 10 Spray UAV is designed for the precise spraying of liquid products for the treatment of surfaces, roofs and facades. It offers a new treatment solution intended for many applications with significant economic and environmental gains (spraying as close as possible to the area to be treated to limit product consumption) and high safety of use (remote spraying without contact with the products and without the need to climb on a basket or scaffolding).

These UAVs are designed to clean hard-to-reach surfaces or areas dangerous to humans, and are specially adapted to the temperature and dust conditions encountered in this geographical area. Thanks to its load capacity and autonomy, a HERCULES 10 spray can clean up to 200m<sup>2</sup> of surface in 20 minutes.

*'The successful deployment of the HERCULES 10 Spray UAV is demonstrated by its ability to effectively replace helicopters without endangering personnel and requiring fewer resources, energy and time.'* said Marc Courcelle, CEO of DRONE VOLT. *'This technology demonstrates DRONE VOLT's ability to be part of a sustainable development approach that is now at the heart of our generation's concerns.'*

**Next Press Release: 2020 Annual Report, on the 17<sup>th</sup> of March 2021**

#### About DRONE VOLT

Created in 2011, DRONE VOLT is an aircraft manufacturer specializing in professional civil UAVs and artificial intelligence. DRONE VOLT is established in France, Benelux, Canada, Denmark, the United States, Switzerland and Indonesia. As a global partner, DRONE VOLT offers its customers "turnkey" business solutions including various services and training in UAV piloting.

The DRONE VOLT Group, a member of the GICAT, achieved a turnover of 5.7 million euros in 2020 (unaudited data).

DRONE VOLT is notably a supplier to administrations and industrial companies such as the French Army, the French Ministry of the Armed Forces, ENGIE, Total, Bouygues Energies & Services, the ADP Group, the Gendarmerie des Transports Aériennes (GTA) and international government agencies.

DRONE VOLT is qualified as an "innovative company" by Bpifrance.

**DRONE VOLT is listed on the Euronext Growth market in Paris:**
