## fills up on energy at CIGRE

---

Villepinte, September 4, 2024

**DRONE VOLT, manufacturer of professional civilian UAVs and expert in onboard solutions, announces that its products and services received an excellent reaction at the CIGRE Electricity Utilities Exhibition held from August 25 to 30.**

DRONE VOLT, a regular participant at this exhibition for professionals in the electrical network industry, experienced strong enthusiasm from visitors for its diverse range of products and solutions.

The Group showcased the LINEDRONE, for which it holds exclusive global rights for industrialization and commercialization. This advanced drone is designed to land on live high-voltage lines—up to 315,000 volts—to perform network performance measurements. The HERCULES 20, in its cable-pulling configuration, and the versatile DRONE VOLT KOBRA, capable of conducting various network inspection missions, were also presented to industry professionals.

The service division, DRONE VOLT EXPERT, proved successful, especially with international clients seeking to enhance their electrical network inspection operations using DRONE VOLT's equipment and expertise.

The Group aims to expand through the development of local franchises, offering its expertise and solutions in exchange for exclusive licensing agreements. This strategy would provide DRONE VOLT with substantial upfront payments for geographic exclusivity, followed by ongoing revenue streams based on a share of the licensee's sales. Establishing these types of partnerships is expected to enhance visibility and profitability by 2025, generating recurring income with minimal investment and low operating costs.

DRONE VOLT has received nearly one hundred inquiries in just a few days.

*"The density and quality of the contacts we have made once again confirms the relevance of our solutions," states Marc Courcelle, DRONE VOLT's Managing Director. "Based on this, we remain resolutely optimistic and look forward to taking further orders in the near future."*

**Next press release: Half-year results 1<sup>er</sup> 2024, Wednesday, September 18, 2024.**
