

DRONE VOLT

announces the signing of a three-year international distribution agreement worth over €6 million

Villepinte, July 3, 2025

DRONE VOLT, an expert in embedded artificial intelligence and manufacturer of professional civilian drones, has signed a strategic partnership in the form of a three-year distribution agreement with a minimum purchase of €2 million per year.

DRONE VOLT announces the signing of a three-year strategic partnership agreement covering the sale, promotion, and distribution of its range of professional drones and services.

The agreement signed includes the marketing of DRONE VOLT drones, a three-year development plan, including sales targets, and the establishment of a local training center.

The **HERCULES 20**, **KOBRA**, and **HELIPLANE** drones, as well as specialized solutions such as the **HERCULES 20 HIGH-DRA**¹(high-pressure cleaning), are among the products that will be offered in this context. As a reminder, the latter is designed for industrial applications at great heights. With a maximum takeoff weight of 25 kg, it carries a payload of 15 kg and can operate at heights of over 100 meters. Its adjustable high-pressure spray system delivers up to 250 bar, with a flow rate that can be adjusted from 5 to 50 liters per minute. This technology enables cleaning, maintenance, and surface treatment tasks to be carried out with unmatched efficiency and precision.

"This strategic partnership is a decisive step in DRONE VOLT's international expansion. It enables us to meet growing demand for professional drone solutions, while strengthening our commitment to working closely with our local customers and partners," said Marc Courcelle, CEO of DRONE VOLT. *"This deployment is part of DRONE VOLT's overall strategy to consolidate its presence in high value-added markets through structural agreements and local establishments."*

About DRONE VOLT

Founded in 2011, DRONE VOLT is an aircraft manufacturer specializing in professional civilian drones and artificial intelligence. DRONE VOLT has offices in France, Benelux, Canada, Denmark, the United States, and Switzerland. As a global partner, DRONE VOLT offers its customers turnkey business solutions including various services and drone pilot training.

The DRONE VOLT Group, a member of GICAT, achieved a turnover of €32.7 million in 2024, representing annual growth of 36%.

¹ Equipped with advanced features, the HIGH-DRA also has a microwave radar installed directly on the spray nozzle. This sensor acts as a front collision avoidance system, capable of detecting obstacles in real time and maintaining an adjustable safety distance between the drone and the surfaces to be cleaned, via the radio control. The combination ensures performance, safety, and precision, even in complex urban environments.

DRONE VOLT supplies government agencies and industrial companies such as the French Army, the Ministry of the Armed Forces, Engie, Total, Bouygues ES, ADP, the Air Transport Gendarmerie (GTA), international government agencies, and more.

DRONE VOLT has been designated an "Innovative Company" by Bpifrance.

DRONE VOLT is listed on the Euronext Growth market in Paris:
