

DRONE VOLT

announces a new order for the French Navy

Villepinte, March 4 2025

DRONE VOLT, expert in on-board artificial intelligence and manufacturer of professional civilian UAVs, announces that the French Navy has ordered a new HELIPLANE and a HERCULES 20.

DRONE VOLT's HELIPLANE meets the specific surveillance, reconnaissance and intervention requirements of the French Navy. Thanks to its ability to take off and land vertically, while offering extended flight autonomy and a long range, this hybrid UAV represents a major advance in military air capabilities, offering unrivalled versatility.

Combining the advantages of fixed-wing and rotor UAVs, it offers a high-performance, flexible aerial surveillance solution with a very small footprint. It is designed to carry out a variety of missions, such as coastal surveillance, mapping sensitive areas and supporting search and rescue operations.

Its compact size and advanced operational capabilities also enable rapid deployment and simplified integration in demanding environments.

The deployment of this HELIPLANE marks an important step in the adoption of new technologies by the armed forces, aimed at improving the effectiveness of operations.

DRONE VOLT also specifies that this agreement includes an order for a HERCULE S 20.

« We are delighted to see our technology once again integrated into the French Navy's fleet. This not only symbolises the trust placed in DRONE VOLT, but also the company's commitment to providing high-precision aerial solutions for national security missions. » says Marc COURCELLE, Managing Director of DRONE VOLT.
