

DRONE VOLT

Speeds up deliveries for the HERCULES 20

Villepinte, August 22, 2024

DRONE VOLT, manufacturer of professional civil UAVs and expert in embedded solutions, is accelerating its HERCULES 20 deliveries.

DRONE VOLT, a leading manufacturer of professional civil UAVs and a specialist in embedded solutions, is accelerating the delivery of its HERCULES 20 drones.

Following the historic order of over 40 HERCULES 20 drones announced in early July, DRONE VOLT is now working to fulfill this demand at record speed, leveraging its exceptional supply chain management. The first deliveries are expected to be completed by the end of August.

Additionally, the Group is addressing increasing demand for its "Spray" versions, available in both low- and high-pressure configurations. A major international corporation recently requested these drones to clean some of its most critical infrastructures.

The HERCULES 20, a top performer in its class with the capacity to carry up to 15 kg, is a fully mature model with no further development costs. DRONE VOLT continues to showcase its efficiency and durability through regular demonstrations, which consistently result in new orders.

In the 3rd quarter of 2024 alone, DRONE VOLT is expected to deliver and invoice around 30 Hercules 20 - compared to 26 offered in the first half of 2024.

DRONE VOLT will also exhibit at CIGRE in Paris from Sunday, August 25th. In addition to the LINDRONE, the HERCULES 20 will be shown in its "power line" version, which can be used to pull cables and carry heavy loads during maintenance operations on high-voltage electrical networks, thus facilitating technicians' work.

"DRONE VOLT is experiencing strong demand for its proprietary solutions, which is essential for improving profitability," said Marc Courcelle, CEO of DRONE VOLT. "As previously mentioned, we anticipate receiving additional orders in the coming weeks and months."

Next press release: Half-year results for 1^{er} 2024, Wednesday, September 18, 2024.
