## confirms a new order for 2 HELIPLANES

---

Villepinte, August 5, 2024

**DRONE VOLT, manufacturer of professional civil UAVs and an expert in embedded solutions, has confirmed a new order for 2 HELIPLANES.**

Following the sale of the first unit of this specific drone earlier this year, the Group has received an initial order from a European army, with the potential for additional orders in the medium term.

The HELIPLANE is a fixed-wing VTOL (Vertical Take-Off and Landing) drone, meaning it takes off and lands vertically but flies like an airplane. This capability allows it to perform inspection and surveillance missions lasting several hours over long distances. Available in three versions (with wingspans of 2.4 m, 3.4 m, or 4.10 m), the HELIPLANE can carry up to 10 kg of payload, with a maximum endurance of 220 km and a video transmission range of up to 80 km. It is ideal for day and night surveillance missions.

DRONE VOLT also highlights that these drones are already in stock and can be delivered quickly once fully equipped and, more importantly, after pilot training. The company provides training and services through its fast-growing and highly profitable DRONE VOLT ACADEMY and DRONE VOLT EXPERT solutions.

*"Once again, this order confirms the growing interest we've seen in recent weeks and the appeal of our offerings," said Marc Courcelle, Managing Director of DRONE VOLT. "Following the record-breaking order of more than 40 HERCULES 20 units from a major customer a few weeks ago, another DRONE VOLT technology is proving highly popular. Additionally, we plan to secure more orders for these solutions swiftly and for the DRONE VOLT KOBRA, the group's latest innovation."*

**Next press release: Half-year results for 1<sup>er</sup> 2024, Wednesday, September 18, 2024.**
