

DRONE VOLT

announces a new order for the LINEDRONE and the pursuit of commercial negotiations in the United States and the Middle East

Villepinte, 10 June 2025

DRONE VOLT, manufacturer of professional civil UAVs and expert in embedded solutions, announces a new order for a LINEDRONE and progress in its negotiations in the United States and the Middle East.

DRONE VOLT announces that it has received a new order for a LINEDRONE in North America. This solution for inspecting high-voltage power lines has been designed to carry out critical missions while keeping the power grid operational. The group is also negotiating several service contracts with industrial players interested in the features of this drone.

The LINEDRONE is an autonomous, long-range drone designed for linear surveillance missions. Equipped with multispectral sensors, on-board AI and real-time transmission capabilities, it offers a turnkey solution for operators of high-voltage power grids (> 350,000 volts).

Progress in several international trade negotiations

At the same time, DRONE VOLT is announcing significant progress in its international sales negotiations:

- In the United States, advanced negotiations are underway with a number of private operators to deploy the Group's full range of drones for both surveillance and high-pressure cleaning missions.
- In the Middle East, DRONE VOLT is currently negotiating the deployment of a large number of HERCULES 20 spray UAVs for cleaning building façades and providing other services.

The Group therefore expects to see tangible and significant benefits in the near future, contributing to the objective of achieving positive EBITDA by 2025.

'This strong commercial activity illustrates the relevance of our technologies in demanding markets, and confirms the operational maturity of LINEDRONE and our inspection and surveillance solutions,' says Marc Courcelle, DRONE VOLT's CEO. "We are proud to support our partners in transforming their operational capabilities.'

Next press release: Sales for the first half of 2025, Wednesday 16 July 2025.
