

DRONE VOLT

will be presenting its latest innovation at Milipol from November 14 to 17

Villepinte, October 27, 2023

DRONE VOLT, manufacturer of professional civilian drones and expert in on-board solutions, announces its presence at Milipol, the world's leading event for state safety and homeland security, from November 14 to 17.

This major event will see DRONE VOLT present for the first time its brand-new model equipped with the latest technologies (software and hardware) developed by the group's teams.

In detail, it's a latest-generation drone incorporating ground-breaking software and artificial intelligence solutions. Thanks to the technologies acquired this year from the acquisition of the Danish company Lorenz, the drone can be remotely controlled and can acquire and process data in flight.

This makes the drone an ideal solution for inspection missions. What's more, this innovation is the product of 100% European technological solutions, which should give it a decisive advantage with police forces, armies and administrations in general.

"DRONE VOLT will once again demonstrate its strong capacity for innovation with this drone," says Marc Courcelle, CEO of DRONE VOLT. "We are confident that we will be able to deploy this drone on a large scale very quickly, with deliveries starting as early as the second quarter of 2024. The heavy investments made over the last 12 months will now enable us to offer high value-added solutions that should contribute to significantly improving our margins."

Next press release: sales 2023, Wednesday January 17, 2024
