

## DRONE VOLT

---

### signed a major contract to develop a specific version of LINEDRONE and provide related services.

---

Villepinte, October 7, 2024

**DRONE VOLT, a leading manufacturer of professional civil drones and expert in advanced onboard solutions, proudly announces signing a major contract to deliver high-value-added services. This includes the customized adaptation of the LINEDRONE by its R&D department to meet specific client requirements, alongside comprehensive support services.**

As revealed in recent months, and in line with its goal of reducing costs and leveraging its expertise, DRONE VOLT has secured a significant contract with a major player in the European powerline sector.

The contract specifically entails the development of an upgraded version of the LINEDRONE. The customization, led by DRONE VOLT's R&D teams, will be billed to the client, perfectly aligning with the Group's strategy of providing bespoke solutions while progressively transforming its R&D department into a profit center.

Once developed, this drone, tailored to meet the customer's specific needs, will be operated by DRONE VOLT EXPERT teams, who will also manage the missions and invoicing.

These two aspects of the contract are expected to generate over €0.6 million in revenue over the next 12 months. This contract underscores the complementary nature of DRONE VOLT's divisions and highlights one of its new development strategies, driving strong growth in its services business, the Group's most profitable segment.

*The signing of this contract affirms DRONE VOLT's ability to accelerate the growth of its most profitable activities—services and sales of its solutions—in pursuit of positive EBITDA by 2025.*

**Next press release: Half-year results 1<sup>er</sup> 2024, Wednesday, October 16, 2024.**
