

DRONE VOLT

announces two new orders in the United States

Villepinte, February 27 2025

DRONE VOLT, an expert in on-board artificial intelligence and a manufacturer of professional civil UAVs, has announced that it has received two orders in the United States for a total of 9 units of its HERCULES 20 UAV, which has already met with considerable commercial success in Europe. These orders are fully in line with the Group's strategy of developing its high-margin activities.

DRONE VOLT announces that it has received two new orders in the United States for a total of 9 HERCULES 20 UAVs, its best-selling drone developed by DRONE VOLT FACTORY. These UAVs will be delivered to customers in the coming weeks.

These two significant orders testify to the interest of the American market in the solutions developed by DRONE VOLT. The Group is thus demonstrating its intention to pursue its ambitions in the sector's most important market, following on from the distribution contract signed a few days ago¹.

As a reminder, the Group is currently in discussions with other local distributors, with the aim of covering the entire US market in order to deploy not only its drones and accessories, but also its range of services.

'We are sensing strong interest in our solutions from the US market, at a time when new regulatory constraints are weighing on certain UAVs because of their origin,' says Marc COURCELLE, DRONE VOLT's CEO. 'These two new orders show that we intend to seize every opportunity to grow our business in this strategic market.'

Next press release: Annual results 2024, Wednesday, March 19, 2025.
