

DRONE VOLT

announces a new distribution agreement in Turkey

Villepinte, April 10, 2024

DRONE VOLT, manufacturer of professional civilian drones and expert in embedded solutions, announces a new distribution agreement in Turkey.

This new distribution agreement allows DRONE VOLT to offer its solutions to the Turkish market through the knowledge and network of a local distributor. This distributor is renowned for its expertise in drone pilot training and specializes in drone technology across various sectors, including agriculture, energy, security, and engineering.

This agreement has already resulted in an order for a HELIPLANE, delivered, invoiced, and paid for at the end of March.

As a result, DRONE VOLT continues to expand its distribution network, building on the agreement signed earlier this year in the Middle East. This expansion provides access to previously untapped geographic regions without the fixed costs of establishing a subsidiary or local sales team.

Marc Courcelle, DRONE VOLT, Managing Director: "This partnership strengthens our presence in Turkey and other surrounding countries. Our distributor's know-how and technical expertise, combined with DRONE VOLT's global vision, will create considerable regional opportunities".

Next press release: Sales for the 1st quarter 2024, Wednesday, April 17, 2024.
