

DRONE VOLT

announces the sale of 4 HERCULES 20 in the USA

Villepinte, 12 December 2022

DRONE VOLT, expert in embedded artificial intelligence and manufacturer of professional civil drones, announces the sale of 4 HERCULES 20 in the United States.

The order was for 4 HERCULES 20 drones in the high-pressure spray configuration, which were produced in the DRONE VOLT FACTORY, invoiced and fully paid for prior to delivery.

DRONE VOLT says that the HERCULES 20, in this version, is experiencing growing interest around the world, particularly in North America where demand is increasing. The group expects demand to grow and anticipates further sales of this type of aircraft in 2023.

"The demand for the heavy lift drone of our range is strong," says Marc Courcelle, DRONE VOLT's CEO. "In its spray version, but also equipped with a dropper or a winch, we note that the HERCULES 20 constitutes, with the Linedrone and the Hélicoptère LRS, a relevant and unique solution for many customers. We are once again demonstrating our ability to develop differentiating products that find their audience and meet high expectations in terms of technical, financial and extra-financial performance.

Next press release: Turnover for the financial year 2022, Wednesday 18 January 2023
