

DRONE VOLT

announces a major distribution contract in the Middle East

Villepinte, February 6, 2024

DRONE VOLT, manufacturer of professional civil UAVs and expert in onboard solutions, announces the signature of a major distribution contract to conquer the Middle East market.

This promising agreement has been signed with a Middle East-based player with solid experience of the local market. The partners have signed up for a 2-year period, with the ambition of deploying the high added value solutions that DRONE VOLT has to offer. These include drones developed and assembled within DRONE VOLT FACTORY, DRONE VOLT EXPERT services and DRONE VOLT ACADEMY training.

The partnership could lead to distributor exclusivity if a significant volume of sales is generated over the next 2 years.

To date, DRONE VOLT has already delivered and invoiced a complete solution, including one HERCULES 20 and a spraying solution, which will be deployed in the next few days for road sign and window cleaning missions. A DRONE VOLT EXPERT team could also be called in to carry out missions and train pilots on site.

"This agreement is significant for DRONE VOLT, as it enables us to develop additional business in an area where we had very little presence," declares Marc Courcelle, DRONE VOLT' Chief Executive Officer. "Our partner mentioned its great ambition for the area, especially as DRONE VOLT supplies not only added value equipment, but also associated services, allowing to respond to all types of missions".

Next press release: Annual results 2023, Wednesday March 20, 2024.
