

## DRONE VOLT

### draws very positive balance from its presence at the Eurosatory

Villepinte, June 25th, 2024

**DRONE VOLT, an expert in onboard artificial intelligence and a manufacturer of professional civilian drones**, draws a very positive balance from its presence at Eurosatory, the world's leading land and air-land defense and security exhibition.

The Group presented its dedicated solutions:

- The DRONE VOLT KOBRA is a unique drone with an NVIDIA processor compatible with artificial intelligence tools and an aluminum structure for cooling electronic components.
- The HERCULES 20, presented with its winch, can carry more than 15 kilos for more than 30 minutes.
- The HELIPLANE LRS PRO BELUGA is a fixed-wing drone with a payload of 10 kilos and more than 2 hours of flight time.

The number of qualified inquiries for drone solutions and services far exceeded the number of inquiries DRONE VOLT has ever received at previous events of this type. As a result, the Group was able to sign up approximately one hundred new prospects, 90% of whom were international.

Stefano Valentini, Chairman of the Board of Directors, was present at the show to welcome the many foreign delegations that flocked to the DRONE VOLT stand: *"Drones are now at the heart of defense and security projects. All national and international organizations have expressed their desire to build a real European drone industry, no longer dependent on the Chinese industry, and even to quickly ban the use of their solutions"*.

On the sidelines of this event, DRONE VOLT CEO Marc Courcelle (on the right in the photo) had the opportunity to personally present DRONE VOLT to Mr. Sébastien Lecornu, Minister of the Armed Forces (on the left in the photo).

Marc Courcelle adds: *"Eurosatory was the occasion for DRONE VOLT to sign the Drone Pact Charter with the French Ministry of the Armed Forces and 50 French manufacturers. This pact aims to streamline the relationship between drone manufacturers and the French government. It reflects the paradigm shift in our industry and the recognition of its strategic importance at the highest levels of government."*

*Now that the spotlight is on, DRONE VOLT is looking to quickly convert intentions into firm orders and maintain its current high growth momentum.*

**Next press release: 1<sup>st</sup> Half Year Sales 2024, Wednesday, July 10, 2024**
