

DRONE VOLT

announces the sale of the HERCULES 20 to a European defence industrial group

Villepinte, 10 April 2025

DRONE VOLT (the ‘Company’), manufacturer of professional civil UAVs and expert in onboard solutions, announces that it has sold and delivered its HERCULES 20 UAV to a leading industrial group in the European defence sector. This acquisition is accompanied by a specific training programme for pilots operating these aircraft in a strategic context.

This latest sale is part of a particularly buoyant sales dynamic since the start of the year, at a time when defence-related equipment is in great demand.

It also illustrates once again the strong demand for its best-selling drone, developed in-house. The HERCULES 20 is a robust, multi-purpose UAV with 8 redundant engines and a 15kg payload. It is designed to meet the requirements of industrial and security applications. It is capable of carrying heavy payloads and stands out for its ability to adapt to critical missions, particularly in the fields of surveillance, inspection and operational support.

As part of the sale, DRONE VOLT's teams also provided in-depth training for several pilots, ensuring that they got to grips with the systems and integrated the drones effectively into the industrial group's operations.

This operation is fully in line with DRONE VOLT's strategic roadmap, which aims to give priority to gross margin, through the sale of its drones developed in-house and specific services, such as training.

With this new delivery, DRONE VOLT continues to strengthen its position in the high added-value professional drone market and confirms its ability to meet the requirements of the most demanding sectors, in particular defence and security.

Marc COURCELLE, Managing Director of DRONE VOLT, said: ‘This collaboration confirms DRONE VOLT's expertise in providing advanced technological solutions for strategic players. We are proud to contribute to European innovation and industrial sovereignty with our UAVs and training services.

Next press release: Q1 2025 sales, Wednesday 16 April 2025.
